

TOUCH-FREE HIGH VOLUME SANITATION

HS1-W1

WALL MOUNTED SANITIZER DISPENSER

As hand sanitation needs continue to rise and become a part of our day to day lives, public places and large operation centers will need to meet the supply demand. Avoid constant replacements and get a sanitizer dispenser that can handle the volume - like the HS1-W1.

This wall mounted sanitizer dispenser is designed to hold a standard 1 gallon size jug of liquid sanitizer. Built of heavy-gauge stainless steel the W1 is designed for durability and security. Featuring a large, locking cabinet, it makes storing and refilling sanitizer safe and easy.

Choose the sanitizer best for your set-up and break away from the small, one-time-use methods. This is built to last.

FEATURES:

- Spray nozzles for faster more even coverage.
- Stainless steel, lockable cabinet.
- Animated LED status lights.
- Relay output for entry control integration (turnstiles, counters).
- Jug sensor to notify when sanitizer level is low.
- Adjustable dispense volume.
- No batteries. Plug-in, 115V for constant power.
- Integrated mounting plate for wall installations.
- Dispense tray drain.
- Custom jug cap and suction line.
- Quick disconnect dispense head.

Dimensions	9" x 9" x 26"
Weight	14 lbs.
Dispense Amount	0.4 - 1.6 ml.
Consumption Rate	4,500 dispenses per gal.
Electrical Requirements	115VAC
Capacity**	1 gal.

**Dispense volume will vary depending on product viscosity, temperature, and programmed spray duration (adjustable).*

***Cabinet is designed to hold standard 1 gal. container (not included).*

Status Indication.

Animated LED lights provide feedback for both consumers and staff. Even from a distance, you'll know when the unit is on, dispensing, sanitizer is low, or if there is a problem.

Spray Nozzles.

Better coverage and application method compared to smaller, low-cost dispensers that simply drip or let sanitizer fall into your hand with the potential of missing the target. The hand sensor and nozzle activation are also faster and more responsive than battery powered dispensers.

Adjustable.

10 different spray settings allow for the unit to be customized for any environment. Reduce the amount to use less solution or increase it to ensure consumers are getting enough sanitizer.

Secure

The cabinet on the HS1-W1 includes a lock to secure sanitizer. The wall mounting plate also provides a fixed installation as all mounting fasteners are located behind the dispenser to prevent unintended removal or theft.

Reduce & Reuse.

No more refilling or replacing! HS1 works with a variety of 1-gal containers to keep it running longer without the need to constantly monitor or worry about running out. Even when it does, just refill or replace the container. There's no fancy solution packet or custom attachment that requires a certain type of sanitizer.

Durable.

Built of heavy-duty, thick gauge, stainless steel and injection molded plastic, the HS1 is built to last and withstand continued use and even potential abuse.
