

# SLX-VM-VM

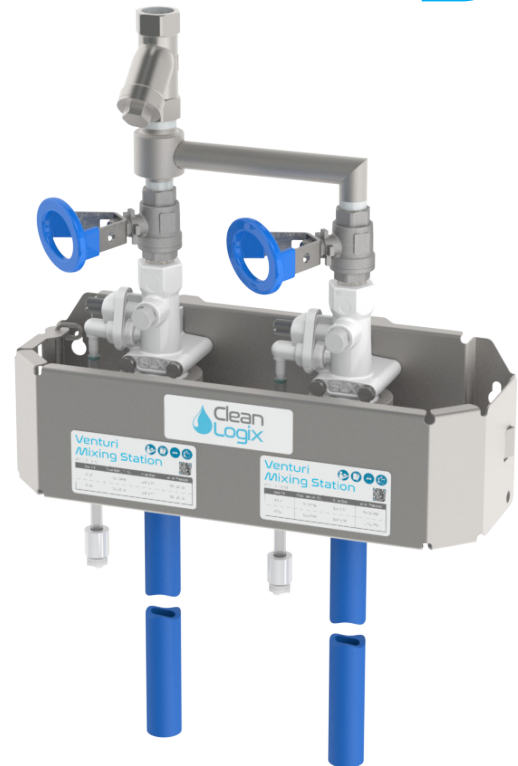

## SLX-MS2 MIXING MULTI-STATION

The SLX Dispensing Station is a two-station chemical proportioner for precisely measuring and diluting two chemical concentrates. The system is ideal for filling jugs and other containers quickly with blended recipes.

These high volume decentralized mixing stations work with city water pressure to dilute two types of chemistry at 10.7 GPM (@ 40PSI) to get you accurately measured, ready to use cleaning solutions.

### Polypropylene

## FEATURES:

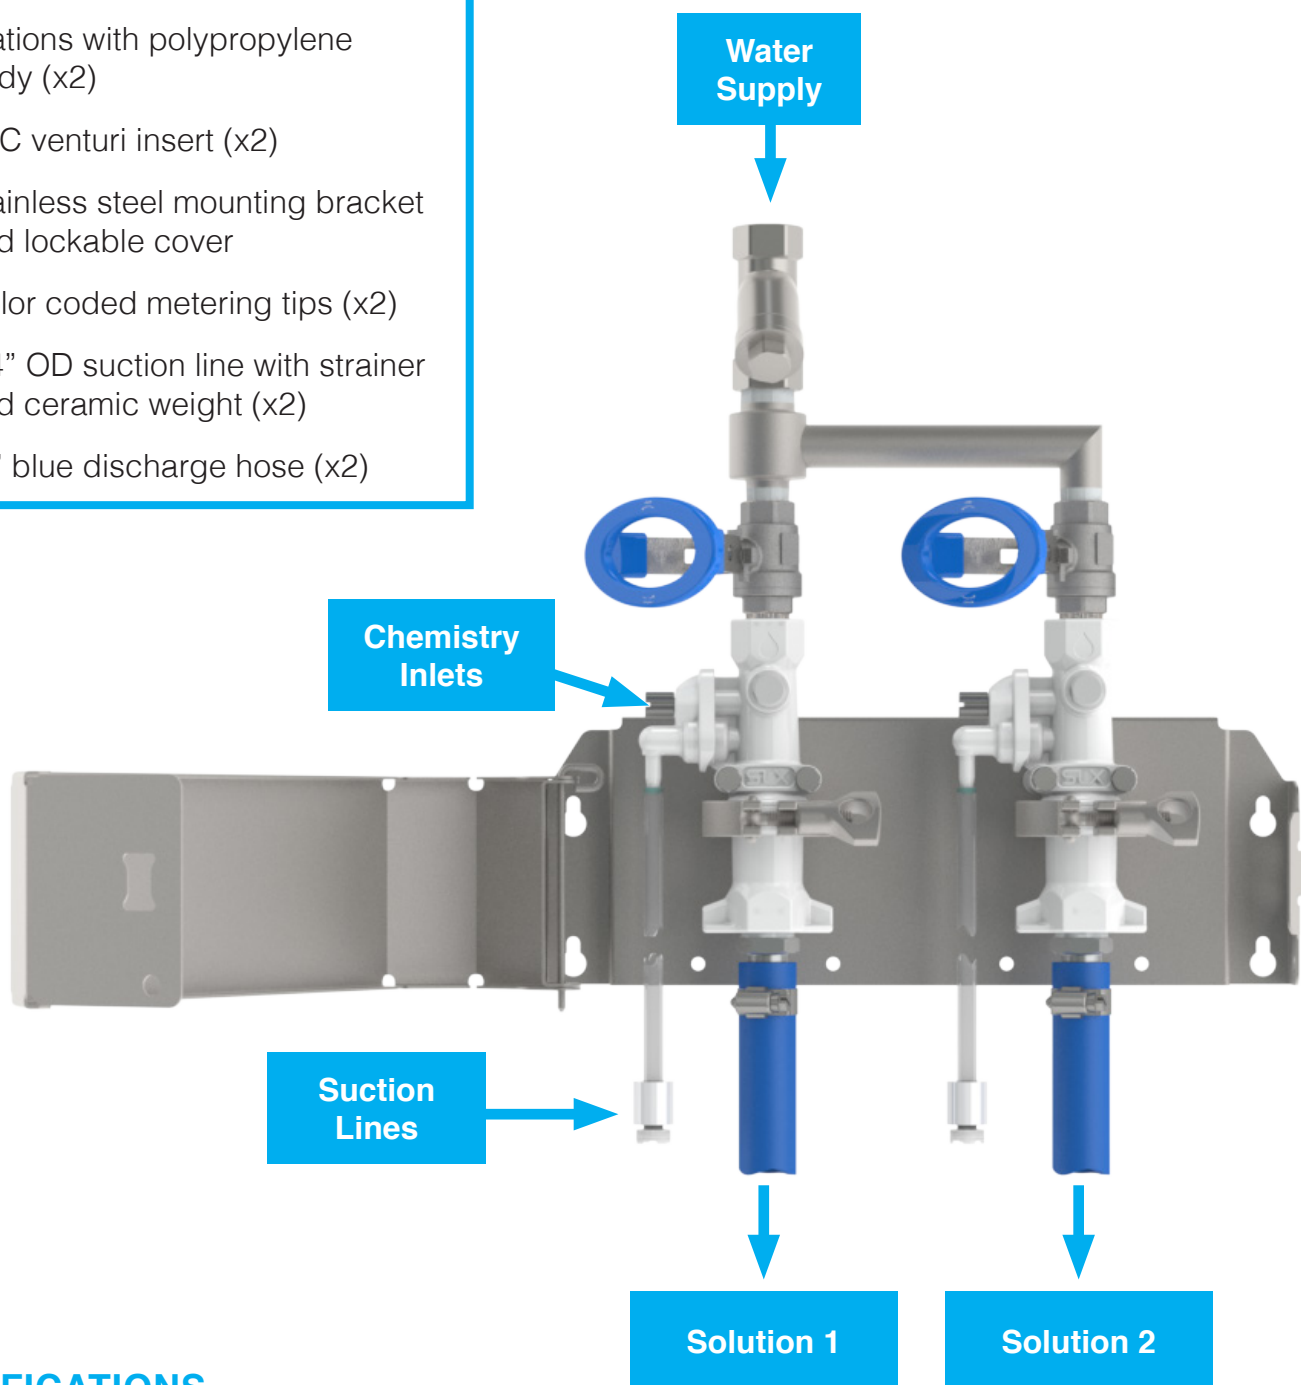

- More efficient and accurate than manual mixing
- Split body design for easy servicing
- Tool free maintenance
- Modular components to alter dilution ratios
- Heavy duty, durable construction
- Lockable stainless-steel cover
- Vacuum breaker plug for quick dispensing
- Large stainless steel ball valves for hands free mixing
- Mixes 2 separate chemistries

Dimensions	15" x 17-3/8" x 6"
Flow Rate	10.7 GPM
Max Temperature	160°F
Water Pressure	35-125 PSI
Max Dilution**	27:1

*\*\*Dilution range will vary depending on insert and hose size.*

**INCLUDES:**

- Stations with polypropylene body (x2)
- PVC venturi insert (x2)
- Stainless steel mounting bracket and lockable cover
- Color coded metering tips (x2)
- 1/4" OD suction line with strainer and ceramic weight (x2)
- 10' blue discharge hose (x2)

**SPECIFICATIONS**

Part Number	Water Flow Rate (GPM)	Hose Size	Dilution Ratios
SLX-MS2-VM107P-VM107P	10.7	3/4" x 10'	3069:1 - 27:1
